About Us!

At P D FIRODIYA GROUP, we believe great design is more than just aesthetics—it's about creating spaces that feel like home. With a passion for detail and a commitment to quality, we transform ordinary spaces into elegant, functional, and personalized environments. From concept to completion, our team works closely with clients to bring their vision to life with creativity, care, and timeless style. Want something shorter, more luxurious, minimalist, or casual? We can tailor it to match your vibe.

Pavan Firodiya

With a passion for turning ordinary spaces into extraordinary experiences, Mr. Pavan Firodiya has founded P. D. Firodiya Group in year 2017 to bring personalized, elegant, and functional design to life. Guided by creativity, detail, and compassion, He continues to lead with excellence.

Our Mission!

To design functional, aesthetic, and timeless interiors that reflect our clients' lifestyle and aspirations. We are committed to delivering innovative designs, quality craftsmanship, and seamless execution that turn every house into a dream home.

Our VISION!

To be recognized as the most trusted interior design firm, setting new benchmarks in creativity, sustainability, and customer satisfaction — creating spaces that inspire, comfort, and add value to everyday living.

MATERIAL

WE USE

P.D.FIRODIYA GROUP
CONSTRUCTION | INTERIOR

Wood (Solid Wood & Engineered Wood)

Lifespan: 15-50 years (depending on type and maintenance)

Used in: Flooring, furniture, cabinetry, wall paneling.

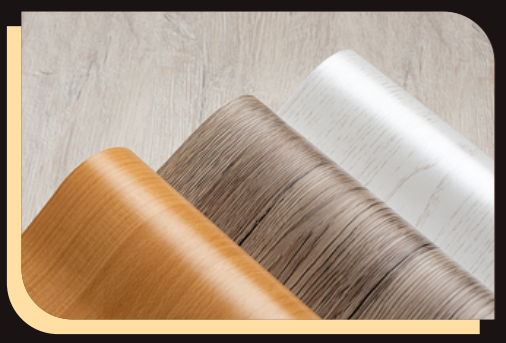
Notes: Solid wood lasts longer and can be refinished multiple times. Engineered wood is more stable in humid conditions.

Laminate

Lifespan: 10-15 years

Used in: Cabinetry, flooring, countertops.

Notes: Cost-effective and comes in various finishes, but may show wear and tear faster than wood.



Plywood

Lifespan: 20-30 years

Used in: Furniture, paneling, modular kitchens.

Notes: Versatile and strong, often used as a base material for other finishes like laminates or veneers.

MDF (Medium-Density Fiberboard)

Lifespan: 10-20 years

Used in: Cabinetry, wall paneling, decorative pieces.

Notes: Less durable than plywood; susceptible to moisture damage, but offers a smooth surface for painting and finishes.

P.D.FIRODIYA GROUP
CONSTRUCTION | INTERIOR

MATERIAL
WE USE

Paint (Emulsion & Enamel)

Lifespan: 5-10 years

Used in: Interior walls, ceilings, trims.

Notes: High-quality emulsion paint can last up to 10 years, while enamel paints are more durable for trims and doors.

Upholstery Fabric

Lifespan: 5-15 years

Used in: Sofas, chairs, cushions, and other soft furnishings.

Notes: Natural fibers (like cotton or linen) wear faster, while synthetic blends (like polyester) are more durable and stain-resistant.

PVC Panels

Lifespan: 20-25 years

Used in: Wall and ceiling coverings.

Notes: Lightweight, water-resistant, and termite-proof. Ideal for moisture-prone areas like bathrooms and kitchens.

Gypsum Board (Drywall)

Lifespan: 20-30 years

Used in: False ceilings, wall partitions.

Notes: Fire-resistant and easy to install but can be damaged by moisture if not sealed properly.
